IN1013 Homework 2 Task 1 Answer

```
Member (Entity)
        membership_no (Primary Key)
        address
        date_of_birth
        club_points
Car (Entity)
        reg_no (Primary Key)
        make
        model
        mileage
        band
Booking (Entity)
        membership_no (Composite Primary Key, Foreign Key)
        reg_no (Composite Primary Key, Foreign Key)
        start_date (Composite Primary Key)
        num_days
Invoice (Entity)
        membership_no (Composite Primary Key, Foreign Key)
        reg_no (Composite Primary Key, Foreign Key)
        start_date (Composite Primary Key, Foreign Key)
        end_date
        cost_points
            Member
    membership_no integer(10)
                                               integer(10)
  name
                  varchar(30)
                                        make
                                               varchar(20)
  address
date_of_birth
                  varchar(150)
                                        model
